

POLISHING GROUP P1

Hard-rubber polishing points

These polishing points are available in one grit combination only. The surface finish is similar to a finish with grit size 100. The hard rubber bond makes these points particularly suitable

for finishing cast materials, hard and soft steels, as well as alloyed and unalloyed steel. They do not clog and have a long and efficient tool life when used with moderate pressure.

P1 polishing point

- ideal for finishing cast materials, hardened and unhardened, alloyed and non-alloyed steel
- manufactured as per DIN 69170
