

POLISHING GROUP P5

Fibre reinforced for wear resistance

The polishing points in this group are characterised by their special fibre-reinforced structure and bonding. This makes them ideally suited for the fine finishing of aluminium and associated alloys, non-ferrous metals and low and high-alloyed steels. The

fibre reinforcement gives these tools exceptional edge-fray resistance and stability. Polishing points in group P5 are available in the grit sizes shown below, and are identified with a red marking on the shank.
